Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group 1 in Paper No. 8 is acknowledged.
2. Claims 11-15 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species and/or invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5 and 8.
3. Applicant's election of Group 1 in Paper No. 5 and 8 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 5, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Chien, U. S. Patent 5,572,817. Chien teaches multi-color electro-luminescent light strip comprising a plurality of discrete electro-luminescent light segments 85-93, wherein the light segments includes a first electrode 3, a second electrode 8, a layer of EL material

Art Unit: 3611

or phosphor layer between first and second electrodes, a plurality of conductive leads 4 and 10 connected to corresponding ones of the first and second electrodes. (See figure 1, and column 1, lines 19-26). A printed circuit layer 108 having conductive segments 95 connected to ones of the first and second electrodes, and electronic component (power supply, not shown) connected to connection terminals 96 and 97. The printed circuit layer is parallel with light segments (illumination assembly)

With respect to claim 2, Chien teaches a transparent front layer 84.

Allowable Subject Matter

3. Claims 3, 4, 6-8, and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following U. S. Documents to Murasko et al. are cited to show electro-luminescent signs 2001/0042329 and 6,424,088.
